FOLD DOWN ALONG
DOTTED LINES
AND ATTACH PAPER-
CLIP TO NOSE OF PLANE

(A)
FOLD IN HALF
ALONG DOTTED LINE
THEN LAY FLAT AGAIN

Northern Flying Squirrel
Small, very soft fur, rich brown above, white below.
Common to Utah, but because it is nocturnal, it is
seldom seen. It spreads its legs and stretches its
flight skin in gliding from tree to tree. It makes a
birdlike chirping sound.
